EC Activities for Spatial Referencing

Spatial Reference Workshop (Paris, November 1999) was an initiative of the European Commission (EC) to use European Reference Systems for Geographic Information Systems

The Spatial Reference Workshop, Paris, November 1999, Recommends that the European Commission:

- **European Geodetic Datum:** Adopts **ETRS89** as the geodetic datum for the geo-referenced coordinates of its own data; Promotes the wider use of ETRS89 within all member states.
- **Geographical Coordinate System:** Normally expresses positions related to ETRS89 datum in **ellipsoidal** type co-ordinates
- **European Map Projections:** Defines its various needs for map projections(s) / obtains further expert advice to determine the appropriate projections (**UTM**).
- **European Vertical Datum:** Adopts the results of the **EUVN/UELN** initiatives when available, as definitions of vertical datum and gravity-related heights (**EVRS**);
- **Results Dissemination:** Disseminates widely the results of the meeting and follow-up activities to the **GIS** industry, standards authorities, and potential users.
