

CGSIC International Information Subcommittee  
21 September 2020

PNT Architecture and MarRINav

Mr. Dana A Goward, Mr. Jonathan Turner and Dr. Alan Grant

# PNT Architecture & MarRINav

Mr. Dana A. Goward

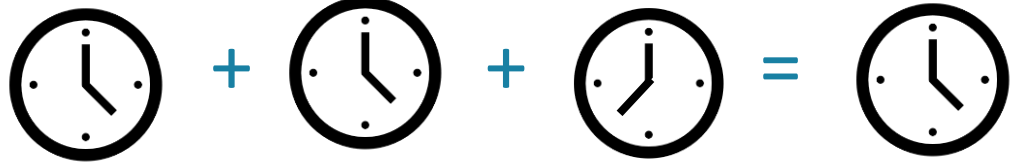

# Safety Critical Systems

Failure or malfunction likely to cause

- Death or injury to person
- Significant loss of property/damage to equipment
- Environmental damage

## Triple Modular Redundancy (TMR):

Voting  $\rightarrow$   Three clock icons with different times (approximately 1:50, 2:10, and 2:30) are shown, followed by an equals sign and one clock icon with the majority time (2:10).

Resilience  $\rightarrow f(p1, p2, p3) \approx .99999$

# National PNT Architecture

|                       |                  |                                      |                       |      |                 |         |     |
|-----------------------|------------------|--------------------------------------|-----------------------|------|-----------------|---------|-----|
| Standards             | Reference Frames | Cryptography                         | Science & Technology  | USNO | NIST            | NGA     | NGS |
| Star Catalogs         | Launch           | <b>ENABLERS &amp; INFRASTRUCTURE</b> |                       | NSA  | Industrial Base |         |     |
| Electro Optical Info. | Modeling         | Mapping/Charting/Geodesy             | Laser Ranging Network |      | Policies        | Testing |     |

# Layered PNT Architecture Construct

- Global** Space-based, Ubiquitous, 3-Dimensional Position and Precise Time
- Regional** Space-based or Terrestrial, Non-global (National/International) Coverage
- Local** Space-based, Terrestrial, and/or Autonomous, Localized by design/performance

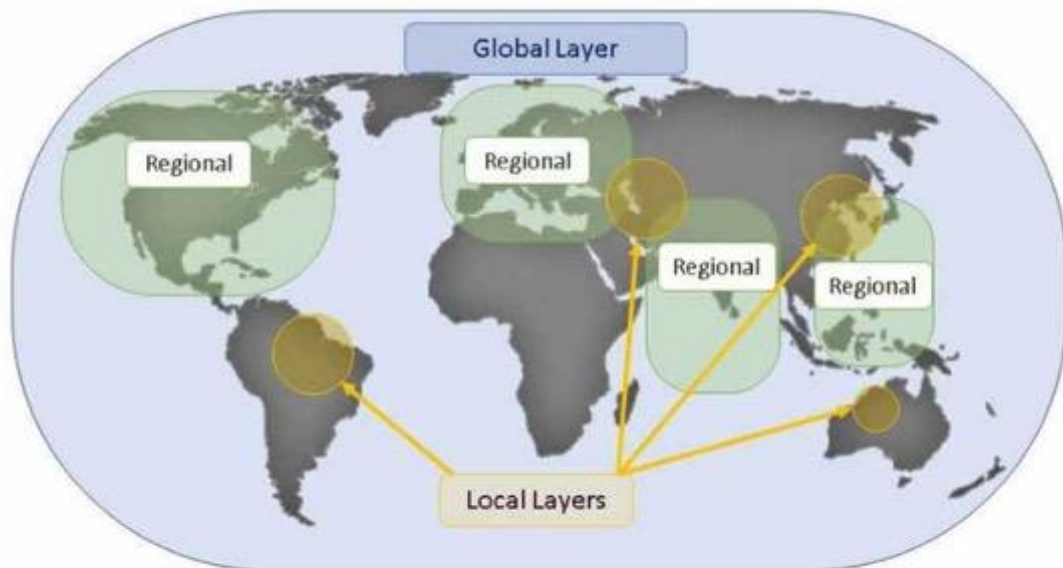

Figure 7 – Layered PNT Enterprise Architecture

# Integrated PNT for the Joint Force

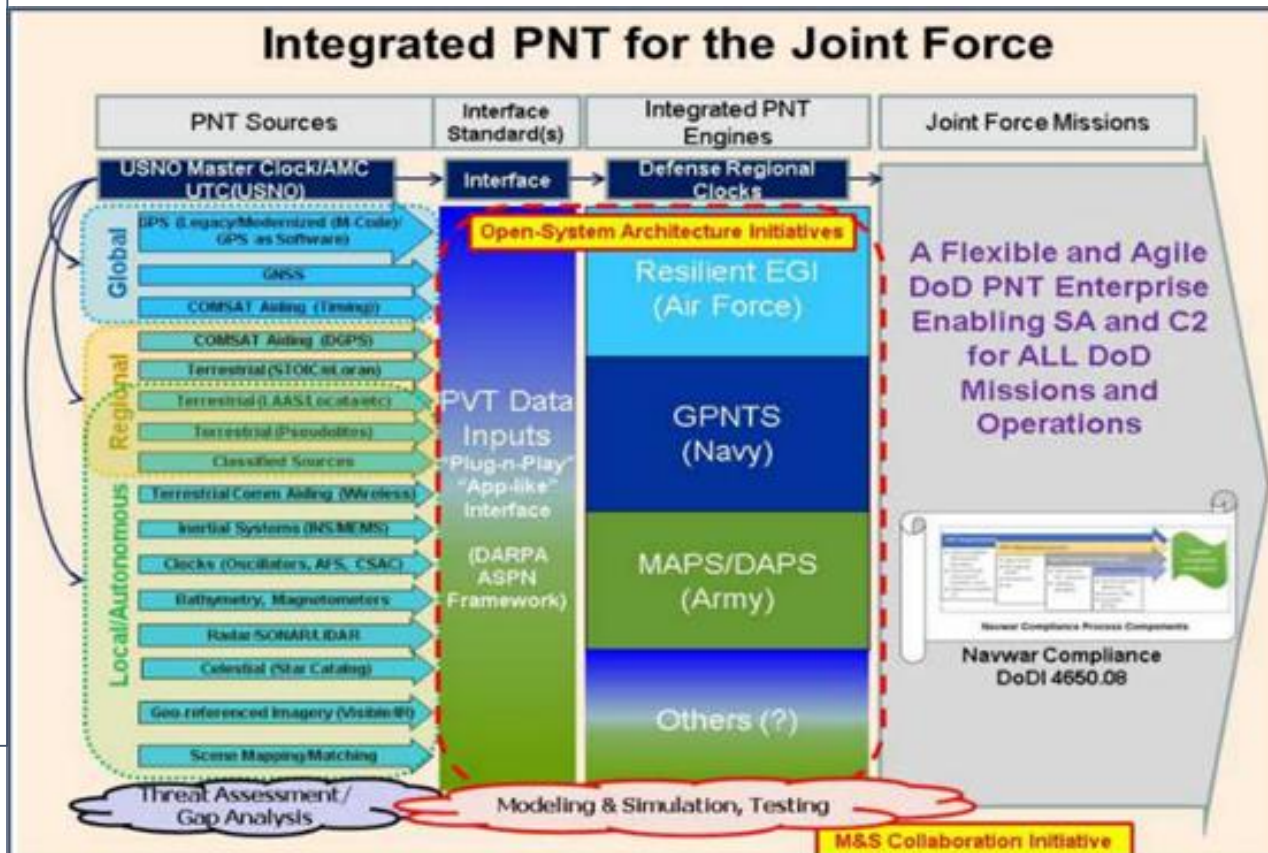

Figure 8 – Notional Capabilities-to-Applications Process

## Positioning, Navigation, & Timing (PNT) Multi-Level Resiliency Model

## Phase 1 project overview

Mr. Jonathan Turner

HMM Algeciras, currently the world's largest container ship (source: kentonline.co.uk)

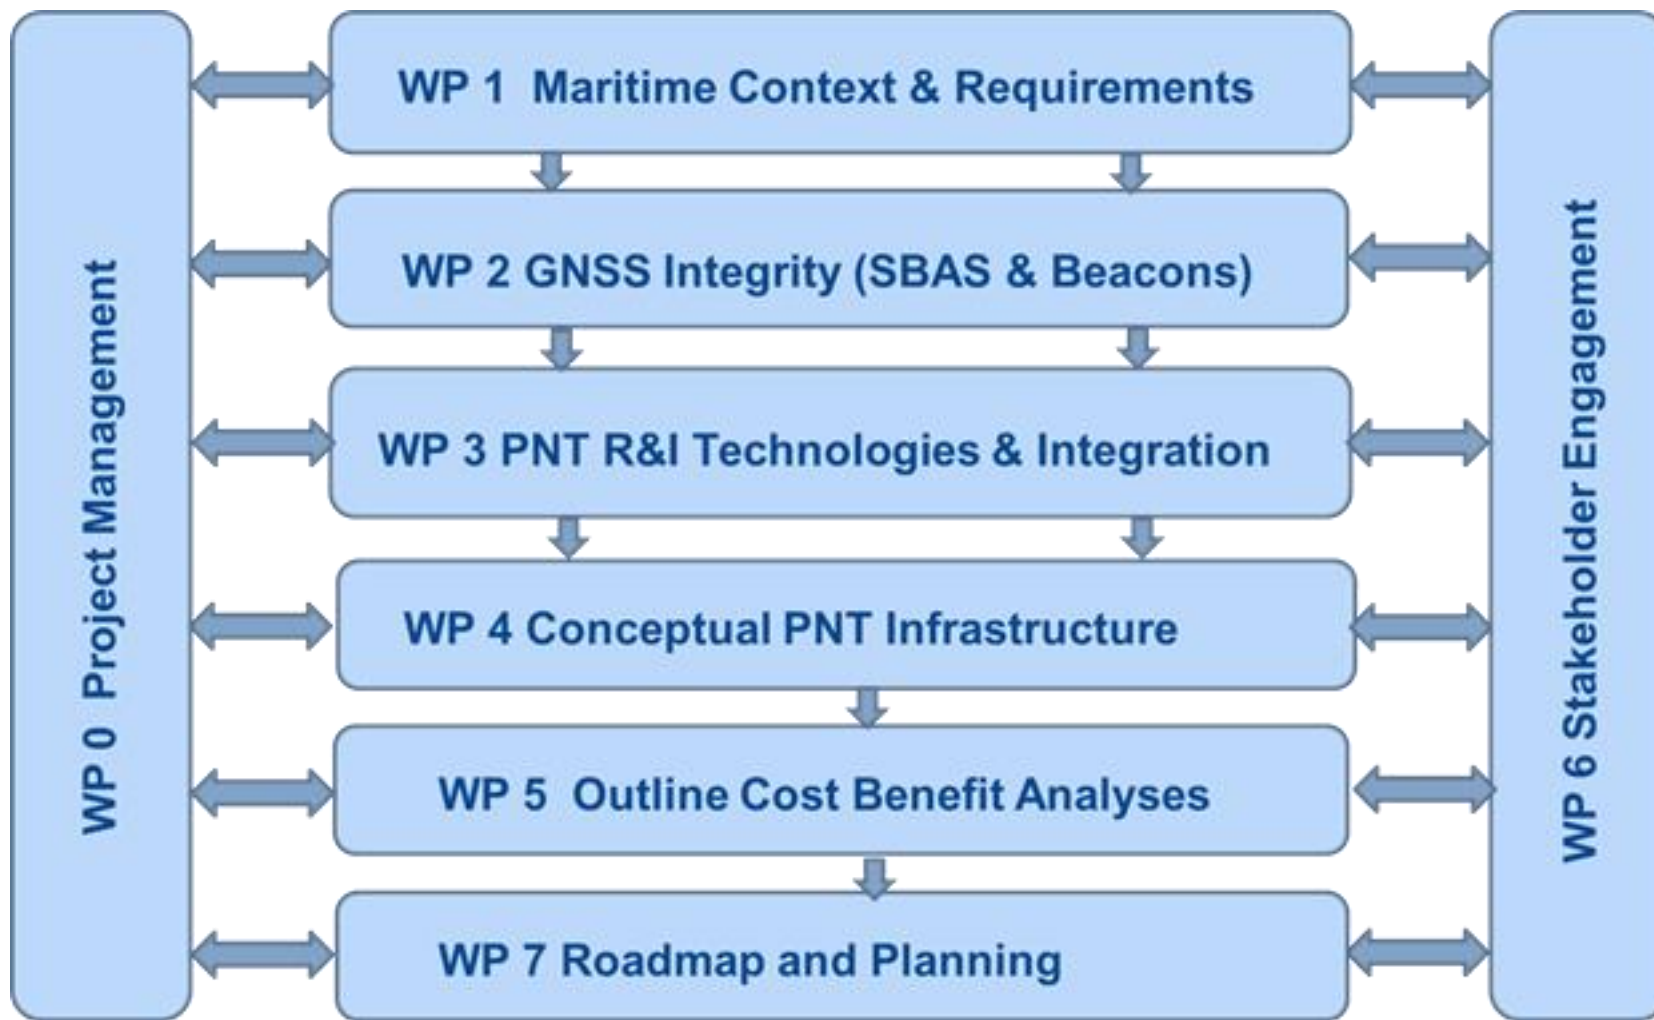

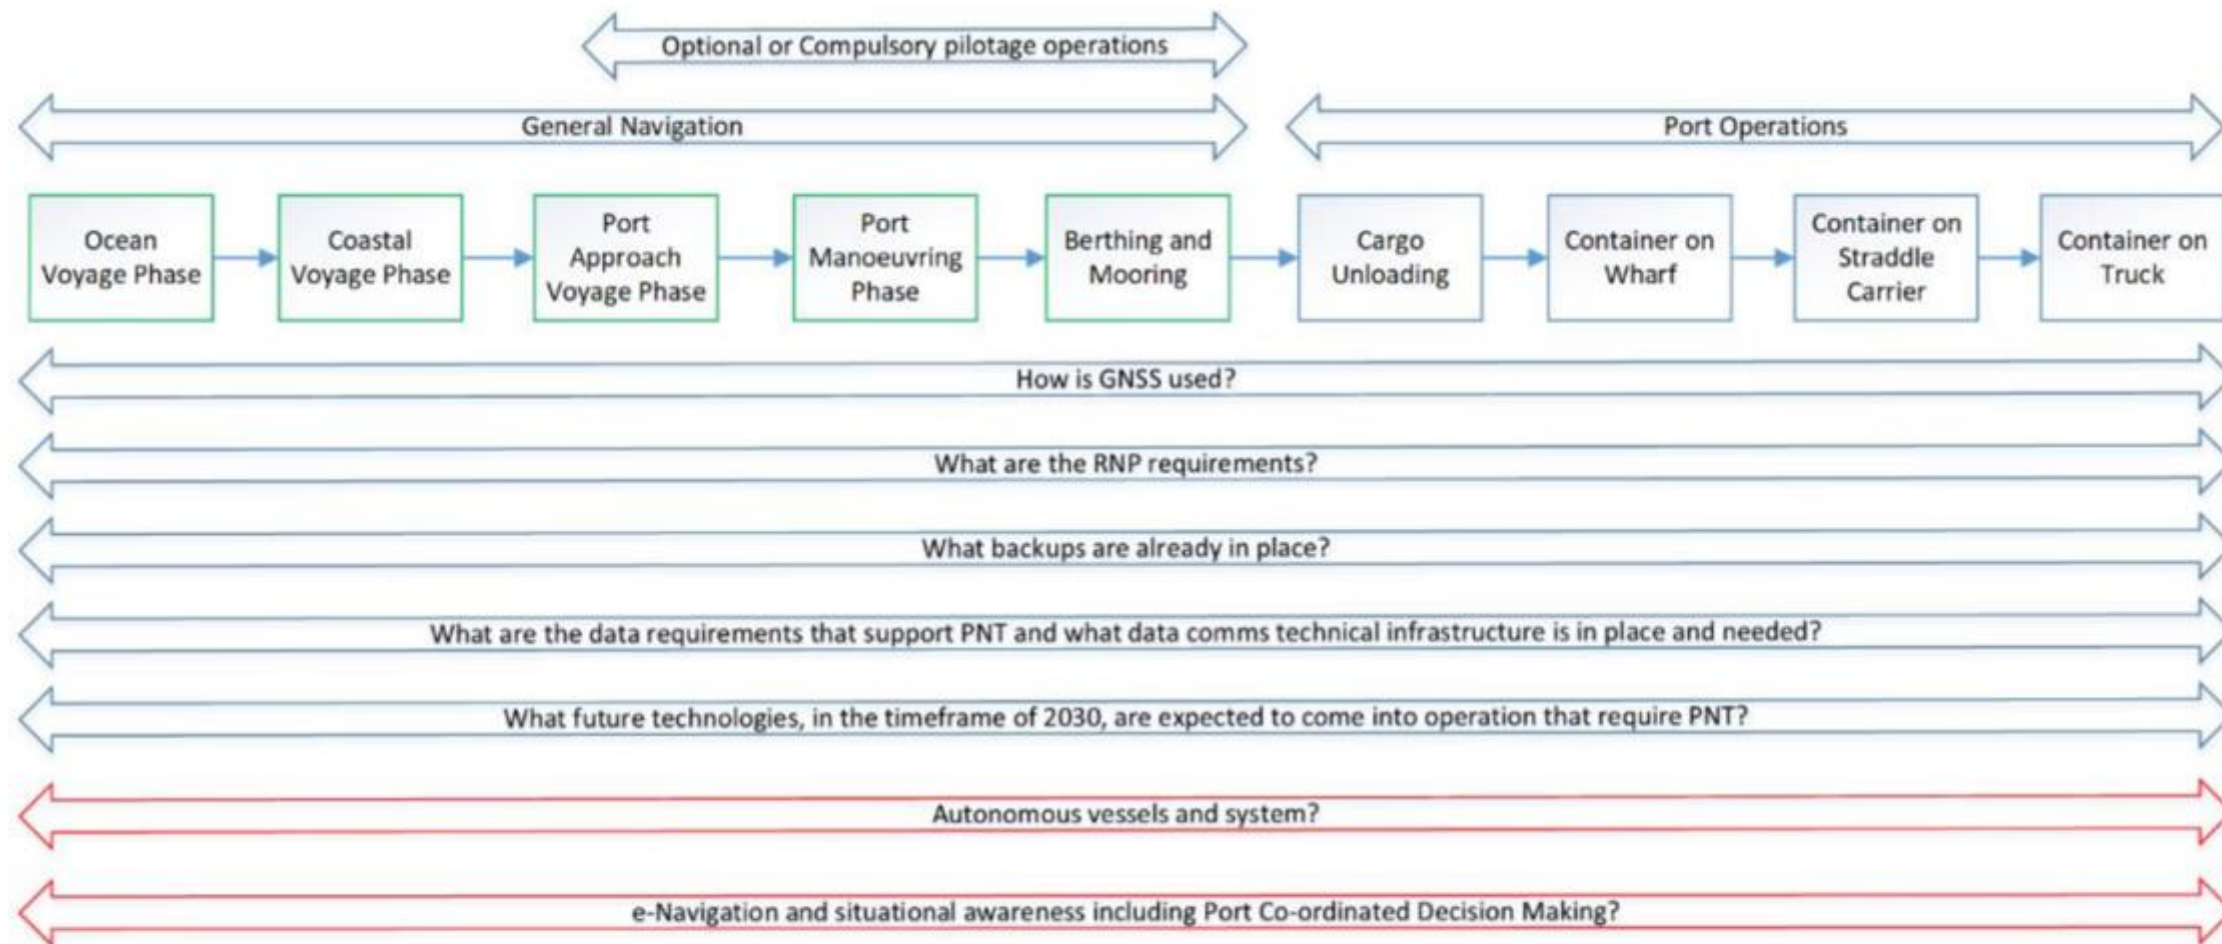

**Figure 10: Scenario of linked Use Cases for maritime analysis.**

# Position, navigation and timing systems considered:

## Global

- GNSS
- Satellites (STL), subject to confirmation of performance

## Wide area

- eLoran

## Local area

- VDES Ranging Mode (R-Mode)
- Radar Absolute Positioning
- LOCATA™

## Onboard

- Traditional and/or inertial Dead Reckoning
- Multi-system receiver (MSR)

Detail on each system is available in MarRINav report D4

| Requirement set (arbitrary numbers) | 1      | 2       | 3      | 4      | 5       | 6    |
|-------------------------------------|--------|---------|--------|--------|---------|------|
| Accuracy (95%)                      | 1000 m | 100 m   | 100 m  | 10 m   | 10 m    | 10 m |
| Integrity Limit with $10^{-5}$ risk | 2500 m | 250 m   | 250 m  | 25 m   | 25 m    | 25 m |
| Distance from coast                 | Any    | <100 km | Any    | <10 km | <100 km | Any  |
| GNSS                                | Yes    | Yes     | Yes    | Yes    | Yes     | Yes  |
| Differential eLoran                 | No     | Yes     | Note 1 | Yes    | Note 3  | No   |
| Differential eLoran with VDES R     | No     | Yes     | Note 1 | Yes    | Note 3  | No   |
| eLoran                              | No     | Yes     | Note 1 | No     | No      | No   |
| eLoran with VDES R-mode             | No     | Yes     | Note 1 | No     | No      | No   |
| MF, VDES or MF/VDES R-mode          | No     | Note 1  | No     | No     | No      | No   |
| Coherent radar ranging with DR      | No     | No      | No     | Note 2 | No      | No   |
| Dead Reckoning (DR) for 15 min      | Yes    | Yes     | Yes    | No     | No      | No   |
| Dead Reckoning (DR) for 3 hours     | Yes    | No      | No     | No     | No      | No   |
| DR + Star Tracker                   | Yes    | No      | No     | No     | No      | No   |

- Note 1: Theoretically possible, but impractical to achieve this level of coverage.
- Note 2: Subject to maturity of the technology
- Note 3: Requirements are met within 30 km of the coast, but not in the 30-100 km range

**Table 3: Comparison of selected PNT technologies with various user requirements.**

# Proposed solution for UK CNI

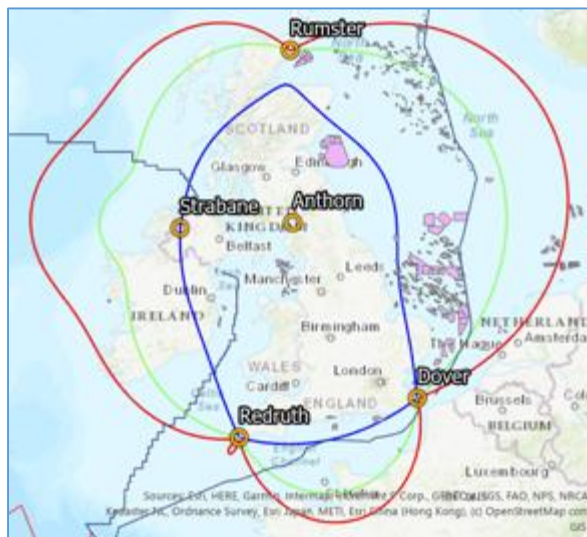

GNSS

Source: GPS.gov

(EGNOS V3 for user level integrity)

+

eLoran

+

R-Mode (VDES)

+

DR

- DR supported by Radar absolute positioning
- Port operations supported by Locata™
- Resilient PNT & I is achieved through a system-of-systems approach

# Staged Project Approach

Phase 1  
Research, Design, Simulate

Phase 2  
Demonstrate and Implement  
Build a 'system of systems'  
system by system

Phase 3  
Explore new sectors and geographies
